**What is this product?**

**Type** This product is a closed-ended investment company.

**Objectives** The objective of this product is to provide shareholders with regular income returns and capital appreciation from a diversified portfolio of sub-investment grade debt instruments. The company's investment policy is to invest predominantly in companies domiciled, or with material operations, in Western Europe across various industries. The company's investments are focused on Senior Secured Obligations of such companies but investments are also made across their capital structure. The company will pursue its investment policy by investing in CVC European Credit Opportunities S.a.r.l (the "Investment Vehicle").

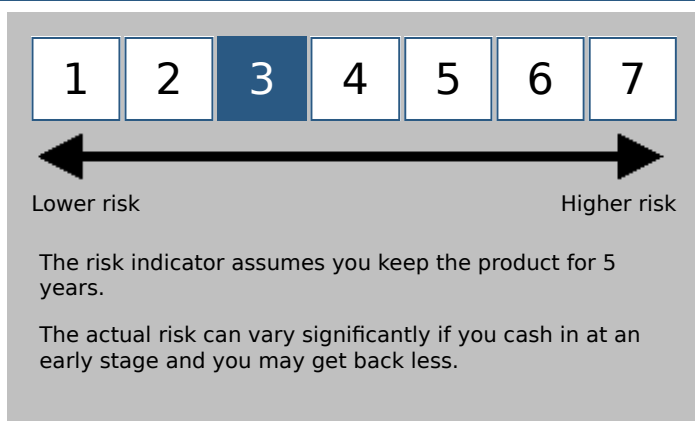

**Intended retail investor** This product is intended for investors who are prepared to take a relatively high level of risk of loss to their original capital in order to achieve a higher potential return. This product is intended to form part of a diversified investment portfolio.

**Maturity date** The product has no maturity date. The Directors are required to propose an ordinary resolution (the "Continuation Resolution") that the company continues its business if the following occur: (i) the NAV falls below €75 million; or (ii) if a share class is delisted for any reason, or, if in any rolling 12 month period, the average daily closing market price of any class of Shares during such 12 month period is 10% or more below the average NAV per share (calculated inclusive of current year income).

If a Continuation Resolution is not passed, the Directors are required to put forward proposals within six months for the reconstruction or reorganisation of the company to the shareholders for their approval.

In addition, it is the stated intention of the Investment Vehicle directors to wind up the Investment Vehicle in 2031, however the Investment Vehicle directors may extend such term at their sole discretion.

**What are the risks and what could I get in return?**

This product invests in unrated and unsecured debt securities. There is a risk that issuers of such instruments may default on the principal and interest and may not be able to pay back in part or full the amount invested.

For further information on the risks of this investment please refer to the Prospectus.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact the capacity to pay you.

This table shows the money you could get back over the next 5 years, under different scenarios, assuming that you invest EUR 10 000.

The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products.

The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the investment/product.

The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

### What happens if CVC Credit Partners European Opportunities Limited is unable to pay out?

The company's shares are listed on the Premium segment of the London Stock Exchange's main market. Should the company be liquidated, the amount you receive for your holding will be based on the value of assets available for distribution after all other liabilities have been paid. Shareholders in this company do not have the right to make a claim to the Financial Services Compensation Scheme or any other compensation scheme in the event that the company is unable to pay out.

### What are the costs?

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs.

The amounts shown here are the cumulative costs of the product itself, for three different holding periods. They include potential early exit penalties. The figures assume you invest EUR 10 000. The figures are estimates and may change in the future.

#### Costs over time

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

The following costs are not included in the entry and exit fee calculation: broker commission, entry and exit charges paid to your fund manager, platform fees, mark ups, stamp duty, transaction tax and foreign exchange costs.
