## What is this product?

**Type** This product is a Packaged Retail and Insurance-based Investment Products (PRIIP) and consists of GBP-denominated ordinary shares issued by CVC Income & Growth Limited (registration number: 112635) (the "Company" or "Product"), which is a Jersey closed-ended investment company. The Company's GBP-denominated ordinary shares are traded on the Main Market of the London Stock Exchange (LSE) under ticker "CVCG". The Company is also the PRIIP manufacturer.

### Objectives

**Product objectives** The objective of this Product is to provide shareholders with regular income returns and capital appreciation from a diversified portfolio of predominantly sub-investment grade debt instruments.

**Investment policy** The Company's investment policy is to invest predominantly in debt instruments issued by companies domiciled, or with material operations, in Western Europe across various industries. The Company's investments are focused on senior secured obligations of such companies but investments are also made across their capital structure. The Company pursues its investment policy by investing in CVC European Credit Opportunities S.a.r.l (the "Investment Vehicle").

**Distribution policy** Income generated by the Company may be distributed on a quarterly basis.

**Intended retail investor** This Product is intended for investors who are prepared to take a relatively high level of risk of loss to their original capital in order to achieve a higher potential return. This Product is intended to form part of a diversified investment portfolio.

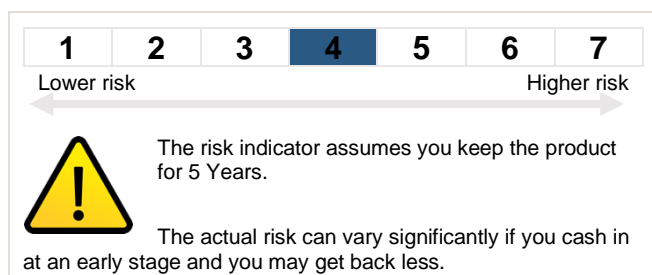

**Term** The Product has no maturity date. The Directors are required to propose an ordinary resolution (the "Continuation Resolution") that the Company continues its business if the following occur: (i) the NAV falls below €75 million; or (ii) if a share class is delisted for any reason, or, if in any rolling 12 month period, the average daily closing market price of any class of Shares during such 12 month period is 10% or more below the average NAV per share (calculated inclusive of current year income). If a Continuation Resolution is not passed, the Directors are required to put forward proposals within six months for the reconstruction or reorganisation of the Company to the shareholders for their approval. In addition, it is the stated intention of the Investment Vehicle directors to wind up the Investment Vehicle in 2031, however the Investment Vehicle directors may extend such term at their sole discretion.

### Practical information

**Further information** Copies of the most recent Prospectus and financial reports may be obtained in hard copy without charge, in English, from the Company's registered office or in soft copy from the Company's website. Monthly performance reports are also available on the Company's website.

## What are the risks and what could I get in return?

### Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact the capacity to pay you.

***The Product's investments are focused on senior secured obligations of companies domiciled, or with material operations, in western Europe. Investments are made across the capital structure of such borrowers. For further information on the risks of this investment please refer to the most recent Prospectus published on the Company's website at [ig.cvc.com](http://ig.cvc.com).***

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

### Performance Scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

## What happens if CVC Income & Growth Limited is unable to pay out?

The Company's shares are listed on the Premium segment of the London Stock Exchange's Main Market. Should the Company be liquidated, the amount you receive for your holding will be based on the value of assets available for distribution after all other liabilities have been paid. Shareholders in the Company do not have the right to make a claim to the Financial Services Compensation Scheme or any other compensation scheme in the event that the Company is unable to pay out.

## What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- GBP 10 000 is invested.

Investment <b>GBP 10 000</b> Scenarios	If you exit after 1 Year	If you exit after 5 years
<b>Total Costs</b>	386 GBP	1 983 GBP
<b>Annual Cost impact(*)</b>	3.9%	3.9% each year

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 2.46% before costs and -1.42% after costs.
