Summary

Macro outlook remains uncertain

- Recent events in Venezuela and Greenland have increased geopolitical risk further
- High equity valuations and increasing concentration in certain indices
 - 10 largest stocks in S&P 500 account for 41% of market cap

Corporate credit markets remain in good shape

- A lot of negative press driven by First Brands
 - First Brands accounts for ~0.18% of the European loan market
 - CVC Credit had no exposure to First Brands and declined the name several times in Investment Committee over the last decade
- Overall default rates remain manageable
 - Default rates in the European market were 1.44% compared to the 10-year average of 1.11%¹

Portfolio

- Portfolio remains in good shape with 3.5% revenue growth and 1.3% EBITDA growth in the portfolio in 2025

Dividends

- Board has given guidance for 2026 dividend of 9.25p for GBP share class and 7.25c for EUR share class
- Top up dividend of 0.45p for the GBP share class

Growing trust

- Market cap of GBP share class has nearly doubled over the last 3 years as a result of capital gains and issuance of shares
- Largest issuer as %age of market cap in 2025 in the investment trust world

Company G	Healthcare	Mid 50s	Senior Secured Loan of a leading nursing home operator in France, Spain and Belgium
Company H	Hotels, Restaurants & Leisure	Mid/High 80s	Senior Secured Bond of a global theme parks and attractions operator
Company I	Food and Drug	Mid 70s	Senior Secured Loan of a specialty distributor and manufacturer of bakery ingredients, products and supplies
Company J	Transportation	High 80s	Senior Secured Loan of a leading remanufacturer of replacement parts to the North American automotive aftermarket

For informational purposes only.

Note, investments represent the top-10 Opportunistic investments, by market value. Excludes certain investments held across the CVC platform where a heightened degree of confidentiality exists. Data as at 31 December 2025.

The investments presented herein are for illustrative purposes only and are not intended to provide an investment recommendation or be indicative of any future investments that CVC Capital Partners or CVC Credit Partners may make.

Credit Opportunities Case Study

Case Study: Atos

Company Description

Atos (“Atos SE” “ATOFP”) is a France-based global IT services and digital transformation company that provides cloud, cybersecurity, big data, high-performance computing, and infrastructure solutions to enterprise and public-sector clients.

Credit Opportunities Case Study – Atos

- In December 2024, Atos completed a major financial restructuring where lenders recapitalised and took control of the business. The restructuring also introduced strong protections for creditors, including strict leverage and liquidity covenants, as well as provisions around asset sales.
- In early 2025, CVC Credit identified Atos' first lien bonds as an attractive investment opportunity and built a position at an average price of 98.7.
- The total amount of first lien debt was €1.1Bn and the bonds, alongside the first lien term loan, had a pledge over bank accounts where €1.15Bn of cash was sitting at the time of investment. This materially reduced the risk around this investment.
- We leveraged the broader CVC network to engage with stakeholders and advisers who were closely involved in the restructuring process, to further assess management quality and the credibility of the company's turnaround plan.
- At the time of writing, the first-lien bonds trade at ~115 due to strong call protection, reflecting **an annualized return of approximately 29%**.

Revenue by geography

Revenue by portfolio

Company Description

Organon (“OGN US”) is a global pharmaceutical company specializing in women’s health, established brands and biosimilars, operating a diversified portfolio of mature medicines with a broad international footprint.

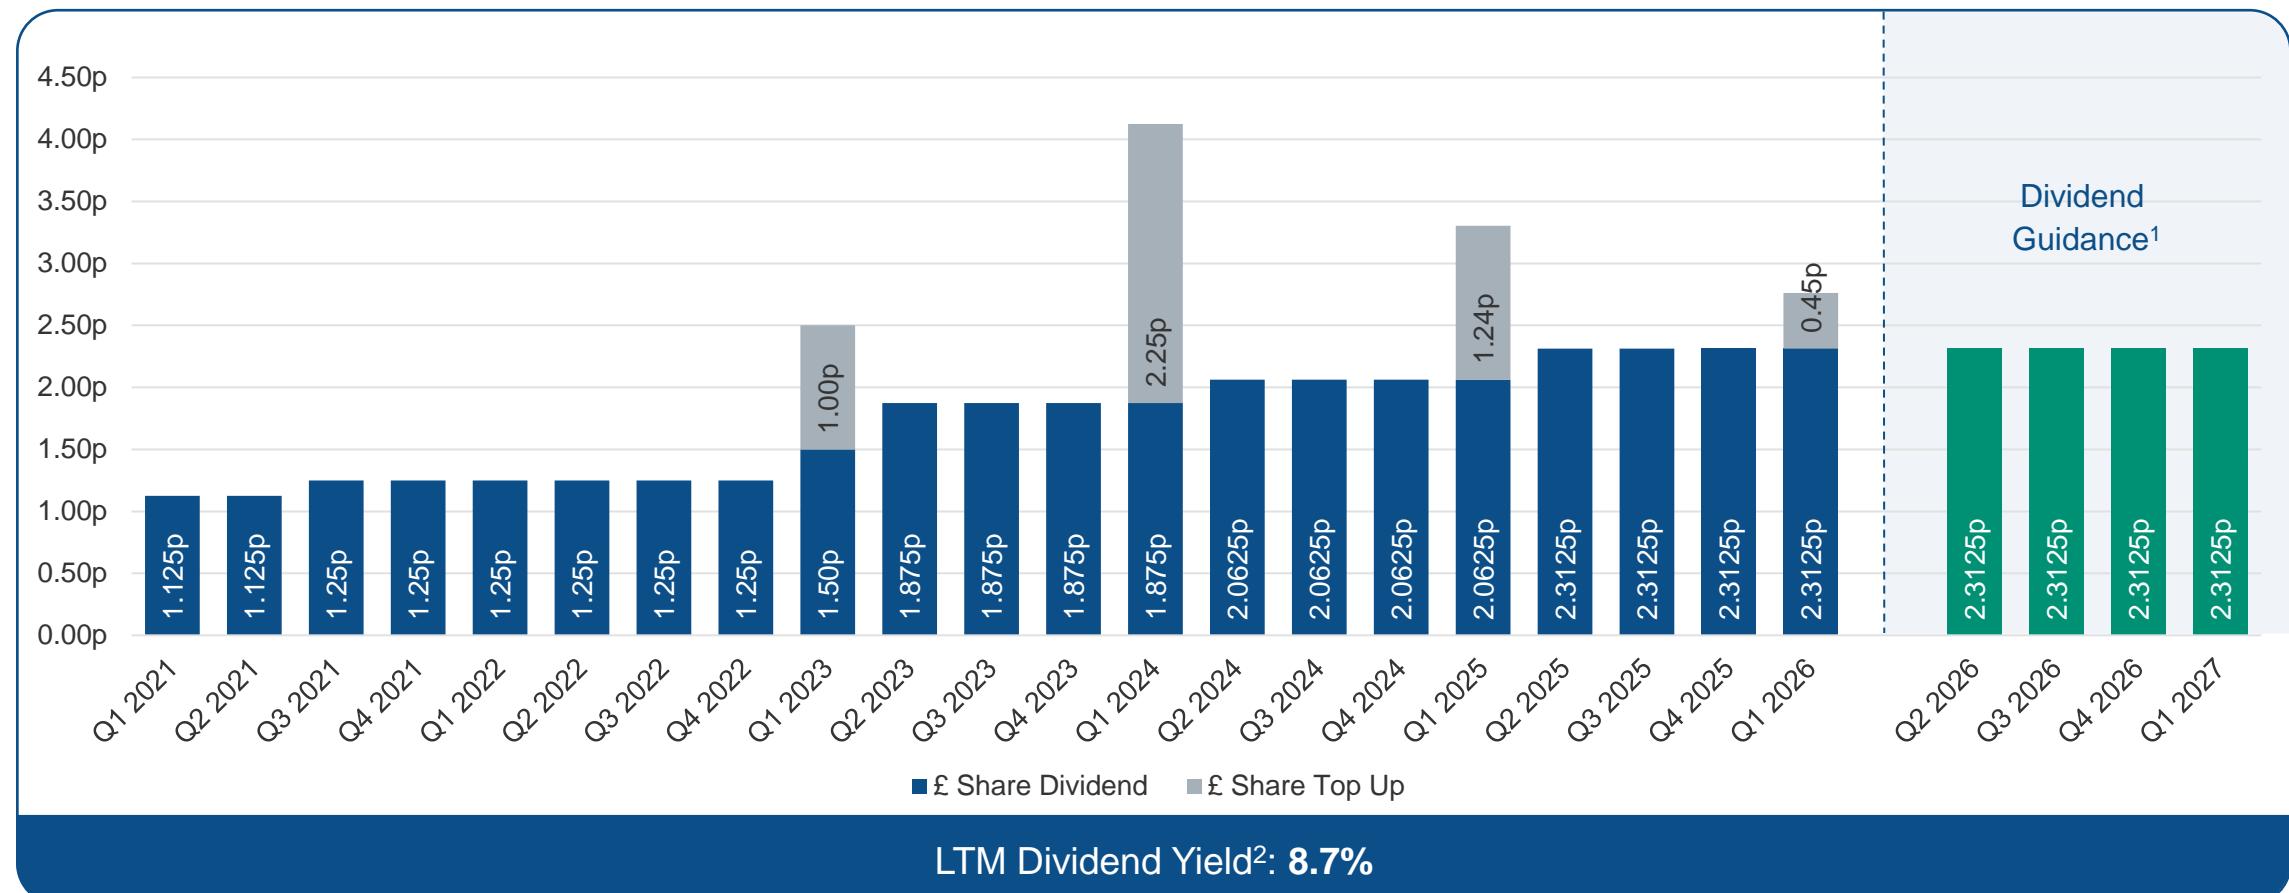

Credit Opportunities Case Study – Organon

- › In July 2025, CVC Credit identified Organon’s unsecured bonds as an interesting opportunity and built a position at an average price of 87.
- › The bonds had sold off materially on U.S. tariff concerns, which we viewed as overdone given the company’s manufacturing footprint. This view was supported by credit-positive management actions, including a dividend cut, a clear commitment to deleveraging, announced asset sales with proceeds earmarked for debt reduction, and ongoing debt buybacks.
- › Leveraging CVC’s broader industry expertise, we concluded the credit was misunderstood and mispriced relative to similarly rated peers.
- › In early 2026, the bonds rallied materially on takeover speculation involving Sun Pharma, and we exited the position at a weighted average price of 97, crystallizing **an annualized return of approximately 31%**.

Dividend Outlook

Dividends Outlook

£ Share Dividends

For informational purposes only.

Past performance is not an accurate indicator of current or future returns and potential investors should have no expectation that past performance can or will be replicated in the future.

1. Dividend payments are targeted in nature and there is no guarantee that investors will receive such dividends. Investors should reference the CVCIG prospectus for a complete list of terms and risks.

2. LTM dividend yield is calculated by adding the LTM dividend payments and dividing by the share price of the respective share class as at 31 October 2025. Inclusive of 6 November 2025 ex-dividend date.

Important Disclosures & Additional Footnotes

Important Disclosures

This presentation (the "communication") is being provided to a limited number of investors solely as a basis for discussion about CVC Credit Partners. This communication is confidential and may not be copied or distributed, in whole or in part, without the written consent of CVC Credit Partners.

This communication has not been approved by any supervisory authority and no regulatory approvals have been obtained. This communication may not be used for and does not constitute an offer to sell, or a solicitation of any offer, or an invitation, or a general solicitation to subscribe for or purchase, or to make any commitments for or in respect of any interests or securities or to engage in any other transaction. Any investor that subsequently acquires any interest may only rely on the terms of and disclosure in a final form offering document (the "Offering Document").

In addition, persons into whose possession this communication has come are deemed to have read prior to the acquisition of any interest, the sections in the Offering Document addressing the legality and otherwise of the sale of investment products in all relevant jurisdictions and any other regulatory legends contained in the Offering Document (which are incorporated by reference herein) and ensured that their receipt of this communication and the Offering Document are in compliance with the laws applicable to them. Nothing contained herein shall be deemed to be binding against, or to create any obligations or commitment on the part of CVC Credit Partners LP nor any of its subsidiaries (collectively "CVC Credit Partners") nor CVC Capital Partners SICAV-FIS S.A nor any of its direct and indirect subsidiaries together with such subsidiaries' respective affiliates (collectively, "CVC Capital Partners", and together with CVC Credit Partners, the "CVC Network" or "CVC"). Neither CVC Credit Partners nor any member of CVC undertakes to provide the recipient with access to any additional information or to update this Presentation or to correct any inaccuracies herein which may become apparent. This Presentation is not to be construed as investment, legal or tax advice and none of the CVC Network nor any of their respective directors, officers, employees, partners, members, shareholders, advisers, agents or affiliates (together the "CVC Credit Partners") make any representation or warranty, express or implied as to the fairness, correctness, accuracy or completeness of this Presentation, and nothing contained herein shall be relied upon as a promise or representation whether as to past or future performance or otherwise. To the maximum extent permitted by law, none of the CVC Credit Partners shall be liable (including in negligence) for any direct, indirect or consequential losses, damages, costs or expenses arising out of or in connection with the use of or reliance on this Presentation.

Certain information contained herein (including certain forward-looking statements, financial, economic and market information) has been obtained from a number of published and non-published sources prepared by other parties and companies, which may not have been verified and in certain cases have not been updated through the date hereof. In addition, certain information contained herein has been obtained from companies in which investments have been made by other pooled investment vehicles or separate managed account arrangements managed or advised by any member of the CVC Credit Partners. While such information from other parties and companies is believed to be reliable for the purpose used herein, no member of the CVC Credit Partners, any of their respective affiliates or any of their respective directors, officers, employees, members, partners or shareholders assumes any responsibility for the accuracy or completeness of such information. Certain economic, financial, market and other data and statistics produced by governmental agencies or other sources set forth herein or upon which the CVC Credit Partners' analysis and decisions rely may prove inaccurate.

Prospective investors should have a high level of financial sophistication and the ability to understand and accept investment risks. The market value of any structured instrument, such as the investment, may be affected by changes in economic, financial, and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility and the credit quality of any issuer or reference issuer. Prior to making any potential investment, potential investors should, at their own expense, consult with their own legal, investment, accounting, regulatory, tax and other advisors to determine the consequences of the potential investment opportunity described herein and to arrive at an independent evaluation of such potential investment opportunity.

Target returns are hypothetical in nature and are shown for illustrative, informational purposes only. This summary is not intended to forecast or predict future events, but rather to indicate the returns for the asset classes indicated herein that CVC Credit Partners has observed in the market generally over the course of an investment cycle. It does not reflect the actual or expected returns of any potential investment and does not guarantee future results. The target returns are based upon CVC Credit Partners' view of the potential returns for investments, are not meant to predict the returns of the investments and are subject to the following assumptions: CVC Credit Partners considers a number of factors, including, for example, observed and historical market returns relevant to the applicable investments, projected cash flows, and relevant other market dynamics (including interest rate and currency markets). Certain of the assumptions have been made for modelling purposes and are unlikely to be realised. No representation or warranty is made as to the reasonableness of the assumptions made or that all assumptions used in achieving the returns have been stated or fully considered. Changes in the assumptions may have a material impact on the projected returns presented. Unless otherwise indicated, all data is shown before management fees, incentive fees, applicable expenses, taxes and does not account for the effects of inflation. Management fees, incentive fees and potential expenses are not considered and would reduce returns. Actual results experienced by investors may vary significantly from the target returns shown. Target Returns May Not Materialise.

To the maximum extent permitted by law, none of the CVC Credit Partners shall be liable (including in negligence) for any direct, indirect or consequential losses, damages, costs or expenses arising out of or in connection with the use of or reliance on this communication. By accepting a copy of the communication, you agree to be bound by the foregoing limitations and conditions.

These materials are intended for use by sophisticated parties as described in Section (c)(1) of the Department of Labor's Fiduciary Rule, 81 Fed. Reg. 68, at 20999 (April 8, 2016). CVC Credit is not undertaking to provide impartial investment advice, or to give advice in a fiduciary capacity for purposes of the Employee Retirement Income Security Act of 1974, as amended or section 4975 of the Internal Revenue Code of 1986, as amended, or otherwise in connection with a decision to invest in any CVC Credit fund. As a result of CVC Credit's receipt of a fee for investment management services and performance-based compensation in connection with CVC Credit funds, CVC Credit has a financial interest in the CVC Credit funds and investments in the CVC Credit funds; however, CVC Credit will not receive a fee or other compensation directly from any investor that fall within the scope of the Fiduciary Rule for the provision of investment advice (as opposed to other services) in connection with a decision to invest in any CVC Credit fund.

CVC Income and Growth is regulated by the Jersey Financial Services Commission.

Additional Disclosures & Footnotes

Case Studies

The selected examples and case studies of investments made by the Fund presented or referred to herein are presented solely for illustrative purposes, are not representative of all transactions of a given type or of investments generally, and are merely intended to be illustrative of some of the types of investments that may be made by the Strategy. No assurance can be given that any pending identified investment opportunity will be consummated within the expected time frame, or at all. References to a particular investment should not be considered a recommendation by CVC. There can be no assurance that CVC Credit Partners will be able to invest in similar opportunities in the future.

The investments presented herein were made under different market, economic and supply-demand conditions than those in which the Strategy will operate, and which may not be replicated. Accordingly, future investments made by the Strategy may have characteristics that differ from the case studies presented in this section. Prospective investors should use their own judgment to appropriately weight or discount such information. It should not be assumed that the specific investments presented or referred to herein were or will be profitable or that any investments made in the future will equal the performance of such investments.

The target gross returns of such unrealized investments are current as at the date specified herein and are based on certain assumptions and estimations that CVC Credit Partners believed to be reasonable as at such date. The actual realised returns generated by unrealized investments included herein may differ significantly from the returns indicated. No guarantee, projection or prediction of future events or results is being provided and no inference to the contrary should be made. Past performance is not indicative of future results. There can be no assurance that the Strategy will be able to implement its investment strategy, achieve its investment objective or avoid substantial losses.

Additional Footnote for Page 20 – CVC European Liquid Credit Portfolio Loan Default & Loss Rates

1. Source: CVC Credit Partners and Morningstar European Leveraged Loan Index, Q4 2024. Data relates to European CLOs, separately managed accounts and commingled funds, from date of inception to Q4 2024. Credit and investment restrictions among these accounts are not uniform. Defaults are defined as assets missing interest or principal payments or undergoing restructuring. The default date is the Morningstar default date (i.e. date of the downgrade to D) which triggers the recognition of the default making the data comparable to the Morningstar default rate (ELLI). The default rate reflects the total par value of assets which entered in default in the contemplated year, as a proportion of the total Liquid Credit European assets under management, for European CLOs, separately managed accounts and commingled funds as at Q4 2024, excluding previously defaulted assets at the start of each year. Note: Up until Q4 2020, CVC European Credit Opportunities (across its Compartments, including separately managed accounts) were included in the analysis. Losses on defaulted assets are shown as a percentage of all assets under management within both European Liquid Credit strategy structures and European CLOs for each specific time frame. The corresponding recovery rates are measured by reference to all cash recovery of principal taking into account the cost basis of the assets as at time of default, any interest received post default, any subsequent principal sales / repayments and adjusted for the current (or estimated) market value of all residual holdings. 2023 and 2024 recovery and loss rates for CVC European Liquid Credit Strategies are estimates only. Loss rates are calculated based on estimated recovery rates, which are based on analyst's model and independent research, and are subject to change. There is no guarantee that these estimates will be achieved and should not be relied upon. Certain restructurings classified by Morningstar as defaults for the purposes of the Morningstar ELLI default data are not treated as defaults by CVC Credit Partners. A total of three assets have been excluded from the data due to i) two consensual restructurings related to an impairment to the subordinated debt within the capital structure not held by CVC Credit Partners where the senior debt remained current through restructuring process; and ii) a negotiation process only leading to covenant Amendment. Data as at Q4 2024. Note: Past performance is provided for illustrative purposes only and not indicative of future results, which may vary. There can be no assurance that the vehicles will achieve comparable results or be able to avoid losses, including loss of all capital.
